

Nightingale Highlights

DECEMBER 2022

Pleasure to Meet the Tuxedo

This conference chair is dressed to impress with its contemporary and sophisticated style that is comfortable enough to stay in all day! With its square contoured back, easy to adjust features and pillow upholstery, the Tuxedo is a distinguished seating solution that takes you from morning to night in effortless style.

The unique contoured back provides the user with additional lateral back support. The plush upholstery with Enersorb™ foam seat conforms to your body and disperses your weight to provide top-shelf comfort and ergonomic support.

The intuitive synchronous tilt-mechanism with single position tilt lock and tension control allows the seat to be angled for

maximum comfort, keeps knees levelled even in a reclined position, and allows your chair's resistance to be as supportive or relaxed as you want.

Arm length is critical to the fit of a suit, which is why the Tuxedo comes equipped with a spring-loaded ratcheting system for easy arm height adjustment. The arms come with sculpted polyurethane adjustable arm pads that provide users with optimal comfort while working at their desk or attending a meeting.

Its pneumatic height adjustment allows users to simply adjust the chair to their desired seat height for ideal posture and comfort control.

The Tuxedo is available in Leather Plus, vinyl or full leather upholstery to deliver a chair that adds a touch of class and luxury to any office or conference room.

Nightingale Mesh: ABLEX™ and Nebula™

Not all mesh is the same and Nightingale's unique **ABLEX™** and **Nebula™** mesh technologies stand out from the rest. Keep reading to learn about these distinctive mesh offerings.

ABLEX™: This translucent weave pattern offers tremendous tensile strength; resulting in superior lumbar support and side-to-side torso flex movement. The monofilament rubberized coating on the polyester mesh enables its “bounce back” memory. Air flows freely through this mesh to offer added comfort in any environment. Nightingale attaches ABLEX™ mesh to the frame to provide the chair with a pre-set tension. ABLEX™ responds to the weight and shape of each user to deliver the exact amount of tension required to provide generous lumbar support while allowing for dynamic movement.

ABLEX™ mesh is featured on Nightingale's Bless, CXO, GXO, LXO, MXO, OXO, WXO, and SXO chairs.

Nebula™: Boasting many of the same ergonomic user benefits as ABLEX™, Nebula™ differentiates itself by being a dual mesh that is interwoven with a 4-way stretch fabric. Using this on the back of your chair allows air to pass freely, making it comfortable in all environments. Nebula™ mesh allows for dynamic movement, so it effortlessly supports the user as they move throughout the day.

Find the ultra-breathable **Nebula™** mesh on the following Nightingale chairs: IC2, EXO, and VXO.

Please note that Nightingale's **ABLEX™** and **Nebula™** mesh options are available in either Black or Silver. Black mesh is standard, where Silver is an upgrade. However, Silver mesh comes standard when ordering a white frame.

Nightingale's Holiday Schedule

Friday Dec. 23rd Factory and Office closed.

Monday Dec. 26th Factory and Office closed.
