TOP 5 Reasons To Purchase Chairs From Nightingale

1 | OUR CHAIRS ARE BUILT TO LAST AND COME WITH A 10 YEAR WARRANTY.

Many of our chairs last longer than 10 years. We will replace any damaged parts of chairs that are still under warranty, free of charge.

2 | OUR STAFF ARE VERY KNOWLEDGEABLE AND CAN ASSIST WITH ANY ISSUES.

They are always reachable and a person will answer any questions that you may have, from sales to shipping, and from warranties to part replacements.

3 | NIGHTINGALE CORPORATION HAS BEEN IN BUSINESS FOR OVER 95 YEARS

Though out the years, Nightingale has maintained a reputation of creating comfortable, stylish and ergonomic chairs, which are durable and built to last.

4 | NIGHTINGALE CARES ABOUT THE ENVIRONMENT

At Nightingale, we aim to produce sustainable seating and reduce the adverse impact that manufacturing has on our environment. We do this in a number of ways, from making smart material choices to designing products that are simple, flexible and durable chairs, which are durable and built to last.

5 | WE TEST EVERY CHAIR THOROUGHLY IN OUR IN HOUSE LABS

At Nightingale, we test everything to its breaking point, then work to make it stronger. We are ISO 9001 and 14001, GreenGuard, and BIFMA E3 Level 2 Certified.

SHOWCASING THE VERSATILITY OF NIGHTINGALE'S PRODUCTS

Nightingale is proud to create quality seating products that exceed the needs of customers across a wide selection of industries and markets. Nightingale's seating collection consists of more than 300 models and our wide range of products ensure that there are high-quality seating options for any unique workplace.

The following case studies highlight Nightingale's diverse product portfolio by showcasing the various workplaces and institutions that use our chairs.

VXO & Khroma: Financial Institution

A financial Institution selected Nightingale's VXO and Khroma as the seating solution for its valued employees.

The mid-back VXO with adjustable arms can be found in their training rooms. The VXO's curved back provides thoracic and lumbar support while earning style points with its contemporary aesthetic. The Nebula™ mesh back allows for air flow while maximizing comfort. Its four-way stretch provides dynamic back support as it follows the movement of the user's back with uninterrupted support.

Its modern profile and user-friendly adjustments make it ideal for a training room which is typically a high traffic area, with multiple users who sit for long periods of time. Every user will feel properly supported in the VXO as it provides a personalized seating experience that facilitates comfort and dynamic movement.

The VXO Stool can be found behind the teller stations. The stool option is the proper fit for this work environment as it provides the correct height without compromising on comfort. The stool design facilitates freedom and allows users to seamlessly

transition from a seated to standing position or vice versa. The lumbar support can be easily adjusted up/down for personalized comfort and ergonomic back support. The Stool model features a sturdy height-adjustable foot ring to support the user's legs.

The premium Khroma chair is featured in the boardroom. Khroma is an executive chair that seamlessly combines ergonomic support with a plush appearance and exceptional styling. The chrome-plated arms with upholstered armrests add to the overall look and feel of the chair. The plush appearance is a result of the pillow upholstery technique that is used on vinyl, leather or leather plus materials over Nightingale's Enersorb™ foam to provide a wrinkled and luxurious aesthetic. The Enersorb™ seat and back foam provide unsurpassed comfort levels as it conforms to your body and evenly disperses weight to alleviate pressure points. The Khroma is a premium yet affordable executive chair that delivers a high-powered finish to any boardroom.

NXO: Renowned College

“The reasons why the College used the Nightingale NXO chairs is affordability, durability, style, readily available when the college needs to order and the functionality (Stackable, wheels) of the chair in the classroom. Moreover, Nightingale Corp who supplied and delivered the product did an excellent job on coordinating the college order, delivering and installing the chairs in the College on time & on schedule. ”

The NXO is a versatile stacking and nesting chair that effortlessly combines comfort with a pronounced engaging design. Its supportive dual hexagonal torsion bar system with preset tension creates the chair’s oscillating back which allows for dynamic movement that supports the natural curve of your spine. This design delivers exceptional ergonomic support and comfort. The NXO also features enhanced seating comfort with our standard Enersorb™ foam in the seat, dispersing weight and pressure points, vertically and horizontally.

Tonik: Confidential Commercial Client

The retro chic Tonik embodies innovation, creativity and quality. This fully upholstered arm chair is a new twist on a venerable design. The swivel-tilt mechanism with pneumatic height adjustment, tension control and single-position tilt lock allows the user to adjust their chair for optimal comfort. This corporation selected the 5-prong polished aluminum base with clear lacquer finish for added durability and shine. Upholstered in a striking red color the Tonik brings a composed, modern and fun look to any meeting space.

Please visit www.nightingalechairs.com to explore all of Nightingale’s seating categories and find the high-quality chair that best fits your employees and corporate space. Remember to view all upholstery options on the Textiles page under the Resources tab, to further customize your Nightingale chair.

The perception of remote work has shifted greatly over the last decade and most dramatically over the past year. This year has proven to hesitant corporations, that working from home can yield positive results. In fact, a study found that more than 60% of business leaders find remote work more appealing now than before Covid. This shift in perspective can be linked to the productivity spike that companies have experienced while operating remotely.

Productivity depends on the time spent in each environment (office and remotely). Fulltime work in any environment detracts from productivity rates, which is why the hybrid workplace will be the new normal. Recent studies have isolated a working-from-home sweet spot, which has been identified as 1 or 2 days of remote work per week. This timeframe results in increased employee productivity when compared to working full time in the office.

In order to support employee health and well-being when working from home, companies have to find ways to maintain workplace standards in remote work environments. Businesses can do this by providing employees with reimbursements for home office equipment purchased during the pandemic. This equipment can include office chairs, monitors, desks or keyboards.

Nightingale has a wide selection of seating options to fit any corporations' needs, from in office to at-home seating. Nightingale has multiple product series and line offerings to choose from: Conference, Executive, Guest, Ergonomic Task, Drafting, Healthcare, Stackable, and Lounge. Our enhanced website makes finding the perfect chair a very simple and personalized process.

Please visit www.nightingalechairs.com to view our wide selection of seating options and explore our Full Line Catalogue. On our site you can use the My Chair Maker application to specify your own chair, obtain virtual literature and learn more about our product offerings. Feel free to contact your local Rep who can assist you in finding the best Nightingale chair to fit your needs.

DESIGN INSPIRATION

Nightingale's Manhattan showroom was created in collaboration with the Huntsman Architectural Group, who is also responsible for designing our successful Chicago showroom. Huntsman is known for elevating the human experience by designing places that connect, sustain, and inspire. Their work prioritizes human wellbeing, social impact and environmental stewardship. This partnership allows Nightingale's culture and brand of quality to be cohesively displayed to clients, designers and brand influencers across North America.

Inspired by the greenery and timeless beauty of Central Park, Huntsman created an inviting and natural atmosphere to display Nightingale's diverse seating collections.

This environment was established by using a color scheme inspired by colors of the season along with earth tones in various shades of green, brown, white and beige. The color palette is neutral and understated yet luxurious and rich. Plants are a key feature of the showroom that

represent the natural green environment of Central Park. The textures and décor found in the room add layers of warmth and familiarity. The use of seasonal colors and foliage creates a natural and organic atmosphere that highlights the distinctive quality and design of Nightingale products.

The showroom's unique layout and architecture is inspired by Central Park's iconic archways. This design feature is incorporated throughout Nightingale's showroom to provide visitors with a sense of familiarity and belonging.

The entryway is flanked by chairs on both sides to represent pillars of an archway. The entrance is meant to entice visitors to walk in and experience Nightingale. The rest of the showroom is thoughtfully laid out as a park's pathway to guide visitors through this artfully constructed display of Nightingale's best product offerings.

With its showroom in the New York Design Center, Nightingale hopes to establish its presence and connect with the residents of this influential design community.

ABOUT US
