# NXO Series

## RECLINING FLEX BACK

A supportive dual-hexagonal torsion bar system for a unique reclining motion — exceptional ergonomic support & comfort for the user.

## SLOPED FIXED ARM

6" at lowest point, 8" at highest point.

## MOLDED SEAT FOAM

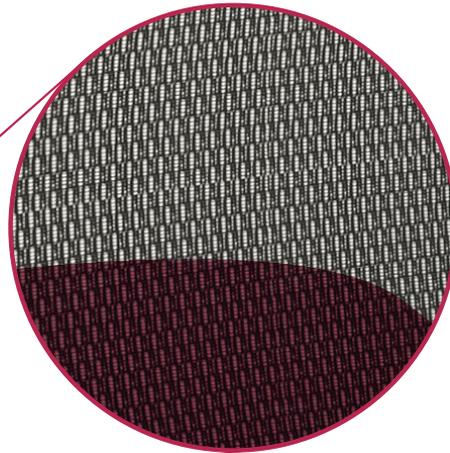

Seat consists of an ultra-comfortable ENERSORB™ foam that allows for greater blood circulation, reducing pressure points and providing extreme comfort.

## SPACE SMART

Folding seats allow the chair to nest horizontally or stacked vertically atop one another for a smart storage solution.

## BASE AND CASTERS

4-leg standard carpet casters or glides.

## ABLEX™

This translucent weave pattern offers tremendous tensile strength; resulting in superior lumbar support and side-to-side torso flex movement.

The monofilament rubberized coating on the polyester mesh enables its “bounce back” memory. Air flows freely through this mesh to offer added comfort in any environment. Nightingale attaches ABLEX™ mesh to the frame to provide the chair with a pre-set tension.

ABLEX™ responds to the weight and shape of each user to deliver the exact amount of tension required to provide generous lumbar support while allowing for dynamic movement.
